The Firm offers its clients local and international legal advice in different areas of law, as well as a range of companies in different jurisdictions, Private Foundations and other legal structures that are fundamental for the administration and protection of assets.

Likewise we offer advice in the preparation of Trusts and Contracts with the purpose of making less onerous the tax impositions that some clients must fulfill.

Its primary mission is to provide clients an optimum service: a professional and personalized treatment. For that reason our firm has personnel specialized in the different areas of Law to cover all needs of its clients.

Our firm is characterized by the seriousness and confidentiality with which it handles the matters entrusted to us.
